1. Business

Health Care REIT, Inc., an S&P 500 company with headquarters in Toledo, Ohio, is an equity real estate investment trust ("REIT") that invests in seniors housing health care real estate. Our full service platform offers property management and development services to our customers. As of March 31, 2013, our diversified portform consisted of 1,133 properties in 46 states, the United Kingdom, and Canada. Founded in 1970, we were the first real estate investment trust to invest exclusively in hear facilities.

2. Accounting Policies and Related Matters

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("U.S. GAA for interim financial information and with instructions to Quarterly Report on Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of th information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three months ended March 31, 2013 are not necessarily an indicati the results that may be expected for the year ending December 31, 2013. For further information, refer to the financial statements and notes thereto included in our Ar Report on Form 10-K for the year ended December 31, 2012.

New Accounting Standards

In February 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2013-02, "Comprehensive Income (Toj 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income" ("ASU 2013-02"), which requires companies to provide information at the amounts that are reclassified out of accumulated other comprehensive income by component. Additionally, companies are required to present significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income. The amendment to authoritative guidance associated with comprehensive income was effective for the Company on January 1, 2013. The adoption of this guidance did not have a material impact on our unaudited consolidate financial statements.

3. Real Property Acquisitions and Development

The total purchase price for all properties acquired has been allocated to the tangible and identifiable intangible assets, liabilities and noncontrolling interests based their respective fair values in accordance with our accounting policies. The results of operations for these acquisitions have been included in our consolidated results operations since the date of acquisition and are a component of the appropriate segments. Transaction costs primarily represent costs incurred with property acquisitional including due diligence costs, fees for legal and valuation services and termination of pre-existing relationships computed based on the fair value of the assets acquire lease termination fees and other acquisition-related costs. During the three months ended March 31, 2013, we finalized our purchase price allocation of certain previously disclosed.

Sunrise Merger

In August 2012, we entered into an Agreement and Plan of Merger (the "Merger Agreement") with Sunrise Senior Living, Inc. ("Sunrise"), pursuant to which we to acquire Sunrise in an all-cash merger (the "Merger") in which Sunrise stockholders would receive \$14.50 in cash for each share of Sunrise common stock. On Jan 2013, we completed our acquisition of the Sunrise property portfolio. The Sunrise Merger advances our strategic vision to own higher-end, private pay properties loc major metropolitan markets. As of March 31, 2013, 71 properties are wholly owned and 54 properties are held in unconsolidated entities (see Note 7 for addinformation). The total estimated purchase price of approximately \$2,763,336,000, including approximately \$2,041,893,000 of cash consideration has been allocate preliminary basis to the tangible and identifiable intangible assets and liabilities in the table above based on respective fair values in accordance with our accordance policies. We funded the cash consideration and other associated costs of the acquisition from cash on-hand as well as draws on our primary unsecured line of cre unsecured term loan (see Notes 9 and 10 for additional information).

Subsequent to the date of acquisition, we recognized \$112,093,000 of revenues and \$36,901,000 of net operating income from continuing operations related Sunrise portfolio during the three months ended March 31, 2013. In addition, we incurred \$63,779,000 of transaction costs, which include advisory fees, due di costs, severances, and fees for legal and valuation services. These amounts are included in the seniors housing operating results reflected in Note 17.

7. Investments in Unconsolidated Entities

During the year ended December 31, 2010, we entered into a joint venture investment with Forest City Enterprises (NYSE:FCE.A and FCE.B). We acquired a 49% interest in a seven-building life science campus located at University Park in Cambridge, Massachusetts, which is immediately adjacent to the campus of the Massach Institute of Technology. At March 31, 2013, our investment of \$174,692,000 is recorded as an investment in unconsolidated entities on the balance sheet.

On December 31, 2010, we formed a strategic partnership with a national medical office building company whereby the partnership invested in 17 medical office properties. We own a controlling interest in 11 properties and consolidate them. Consolidation is based on a combination of ownership interest and control of operatidecision-making authority. We do not own a controlling interest in six properties and account for them under the equity method. Our investment in the strategic partiprovides us access to health systems and includes development and property management resources.

During the three months ended June 30, 2012, we entered into a joint venture (structured under RIDEA) with Chartwell Retirement Residences (TSX:CSH.UN). I portfolio contains 42 properties in Canada, 39 of which are owned 50% by us and Chartwell, and three of which we wholly own. All properties are managed by Chart At March 31, 2013, our investment of \$223,134,000 in the 39 properties is recorded as an investment in unconsolidated entities on the balance sheet. The aggregate remaining unamortized basis difference of our investment in this joint venture of \$7,858,000 at March 31, 2013 is primarily attributable to transaction costs that will I amortized over the weighted-average useful life of the related properties and included in the reported amount of income from unconsolidated entities.

In conjunction with the Sunrise merger described in Note 3, we acquired joint venture interests in 54 properties and a 20% interest in a newly formed Sunrise management company, which manages the entire property portfolio. At March 31, 2013, our investment of \$359,575,000 is recorded as an investment in unconsolidate entities on the balance sheet.

The results of operations for these properties have been included in our consolidated results of operations from the date of acquisition by the joint ventures and are reflected in our statements of comprehensive income as income or loss from unconsolidated entities. 9. Borrowings Under Line of Credit Arrangements and Related Items

At March 31, 2013, we had a \$2,250,000,000 unsecured line of credit arrangement with a consortium of 29 banks. We have an option to upsize the facility by up t additional \$1,000,000,000 through an accordion feature, allowing for the aggregate commitment of up to \$3,250,000,000. The arrangement also allows us to borrow \$500,000,000 in alternate currencies. The revolving credit facility is scheduled to expire March 31, 2017, but can be extended for an additional year at our option. Borrowings under the revolver are subject to interest payable in periods no longer than three months at either the agent bank's prime rate of interest or the applicable over LIBOR interest rate, at our option (1.38% at March 31, 2013). The applicable margin is based on certain of our debt ratings and was 1.175% at March 31, 2013. addition, we pay a facility fee annually to each bank based on the bank's commitment amount. The facility fee depends on certain of our debt ratings and was 0.225% March 31, 2013. Principal is due upon expiration of the agreement. In addition, at March 31, 2013, we had \$10,000,000 outstanding in unsecured revolving demand bearing interest at 1.13%.

10. Senior Unsecured Notes and Secured Debt

We may repurchase, redeem or refinance convertible and non-convertible senior unsecured notes from time to time, taking advantage of favorable market conditio when available. We may purchase senior notes for cash through open market purchases, privately negotiated transactions, a tender offer or, in some cases, through the redemption of such securities pursuant to their terms. The non-convertible senior unsecured notes are redeemable at our option, at any time in whole or from time to in part, at a redemption price equal to the sum of (1) the principal amount of the notes (or portion of such notes) being redeemed plus accrued and unpaid interest ther to the redemption date and (2) any "make-whole" amount due under the terms of the notes in connection with early redemptions. Redemptions and repurchases of do any, will depend on prevailing market conditions, our liquidity requirements, contractual restrictions and other factors. At March 31, 2013, the annual principal paym due on these debt obligations were as follows (in thousands):

Our debt agreements contain various covenants, restrictions and events of default. Certain agreements require us to maintain certain financial ratios and minimum worth and impose certain limits on our ability to incur indebtedness, create liens and make investments or acquisitions. As of March 31, 2013, we were in compliance all of the covenants under our debt agreements.

⁽²⁾ Annual interest rates range from 3.0% to 6.5%, excluding the Canadian denominated unsecured term loan discussed in footnote 4 and the \$500,000,000 unsecured term loan discussed below.

⁽³⁾ Annual interest rates range from 0.4% to 8.0%. Carrying value of the properties securing the debt totaled \$4,157,430,000 at March 31, 2013.

(4) On July 30, 2012, we completed funding on a \$250,000,000 Canadian denominated unsecured term loan (approximately \$245,724,000 USD at exchange rates on March 31, 2013). The loan matures July 2 (with an option to extend for an additional year at our discretion) and bears interest at the Canadian Dealer Offered Rate plus 145 basis points (2.65% at March 31, 2013).

11. Derivative Instruments

We are exposed to various market risks, including the potential loss arising from adverse changes in interest rates. We may elect to use financial derivative instrun to hedge interest rate exposure. These decisions are principally based on our policy to manage the general trend in interest rates at the applicable dates and our percep the future volatility of interest rates. In addition, non-U.S. investments expose us to the potential losses associated with adverse changes in foreign currency to U.S. I exchange rates. We elected to manage this risk through the use of a forward exchange contract and issuing debt in the foreign currency.

Interest Rate Swap Contracts Designated as Cash Flow Hedges

For instruments that are designated and qualify as a cash flow hedge, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income ("OCI"), and reclassified into earnings in the same period, or periods, during which the hedged transaction affects earnings. Gains and losses derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in earnings. As of March 31, we had one interest rate swap for a total aggregate notional amount of \$11,835,000. The swap hedges interest payments associated with long-term LIBOR based borrowings and matures on December 31, 2013. Approximately \$2,911,000 of losses, which are included in accumulated other comprehensive income ("AOCI"), ar expected to be reclassified into earnings in the next 12 months.

Foreign Currency Hedges

For instruments that are designated and qualify as net investment hedges, the variability in the foreign currency to U.S. dollar of the instrument is record cumulative translation adjustment component of OCI. The balance of the cumulative translation adjustment will be reclassified to earnings when the hedged invest sold or substantially liquidated. On February 15, 2012, we entered into a forward exchange contract to purchase \$250,000,000 Canadian Dollars at a fixed rate future. The forward contract was used to limit exposure to fluctuations in the Canadian Dollar to U.S. Dollar exchange rate associated with our initial cash invefunded for the Chartwell transaction. On May 3, 2012, this forward exchange contract was settled for a gain of \$2,772,000, which was reflected on the conso statement of comprehensive income, and the proceeds were used to fund our investment. On May 3, 2012, we also entered into a forward contract to sell \$250,0 Canadian dollars at a fixed rate on July 31, 2012 to hedge our net investment. We settled the forward contract on July 31, 2012 with the net loss reflected in OCI settlement of the forward contract we entered into a \$250,000,000 Canadian Dollar term loan which has been designated as a net investment hedge of our Ch investment and changes in fair value are reported in OCI as no ineffectiveness is anticipated.

On August 30, 2012, we entered into two cross currency swaps to purchase £125,000,000. The swaps were used to limit exposure to fluctuations in the Pound Ste to U.S. Dollar exchange rate associated with our initial cash investment funded for the Sunrise transaction discussed in Note 3. The cross currency swaps have been designated as a net investment hedge, and changes in fair value are reported in OCI as no ineffectiveness is anticipated.

On September 17, 2012, we entered into two forward exchange contracts to purchase \$14,000,000 Canadian Dollars and £23,000,000 at a fixed rate in the future. forward contracts were used to limit exposure to fluctuations in foreign currency associated with future international transactions. These forward contacts were settle March 22, 2013 for a realized loss of \$2,309,000.

On January 14, 2013 and January 15, 2013, we entered into three forward exchange contracts to purchase £675,000,000 at a fixed rate in the future. The forward exchange contracts are used to hedge a portion of our investment in the United Kingdom at a fixed Pound Sterling rate in U.S. dollars and mature on July 16, 2013. T forward exchange contracts were designated as net investment hedges and changes in fair value are reported in OCI as no ineffectiveness is expected.

12. Commitments and Contingencies

At March 31, 2013, we had eight outstanding letter of credit obligations totaling \$6,172,000 and expiring between 2013 and 2014. At March 31, 2013, we had outstanding construction in process of \$86,820,000 for leased properties and were committed to providing additional funds of approximately \$217,172,000 to comple construction. At March 31, 2013, we had contingent purchase obligations totaling \$73,957,000. These contingent purchase obligations relate to unfunded capital improvement obligations and contingent obligations on acquisitions. Rents due from the tenant are increased to reflect the additional investment in the property.

We evaluate our leases for operating versus capital lease treatment in accordance with Accounting Standards Codification ("ASC") Topic 840 "Leases." A lease is classified as a capital lease if it provides for transfer of ownership of the leased asset at the end of the lease term, contains a bargain purchase option, has a lease term than 75% of the economic life of the leased asset, or if the net present value of the future minimum lease payments are in excess of 90% of the fair value of the leased Certain leases contain bargain purchase options and have been classified as capital leases. At March 31, 2013, we had operating lease obligations of \$698,039,000 re to certain ground leases and company office space and capital lease obligations of \$83,499,000 relating to certain investment properties. We incurred rental expense to company office space of \$413,000 for the three months ended March 31, 2013 as compared to \$290,000 for the same period in 2012. Regarding ground leases, we sublease agreements with certain of our operators that require the operators to reimburse us for our monthly operating lease obligations. At March 31, 2013, aggregat future minimum rentals to be received under these noncancelable subleases totaled \$46,831,000.

14. Stock Incentive Plans

Our Amended and Restated 2005 Long-Term Incentive Plan authorizes up to 6,200,000 shares of common stock to be issued at the discretion of the Compensation Committee of the Board of Directors. The 2005 Plan replaced the 1995 Stock Incentive Plan and the Stock Plan for Non-Employee Directors. The options granted to officers and key employees under the 1995 Plan vested through 2010 and expire ten years from the date of grant. Our non-employee directors, officers and key emplo are eligible to participate in the 2005 Plan. The 2005 Plan allows for the issuance of, among other things, stock options, restricted stock, deferred stock units and divic equivalent rights. Vesting periods for options, deferred stock units and restricted shares generally range from three years for non-employee directors to five years for and key employees. Options expire ten years from the date of grant. Stock-based compensation expense totaled \$10,508,000 for the three months ended March 31, 20 and \$11,323,000 for the same period in 2012.

16. Disclosure about Fair Value of Financial Instruments

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value.

Mortgage Loans and Other Real Estate Loans Receivable — The fair value of mortgage loans and other real estate loans receivable is generally estimated by using le and level three inputs such as discounting the estimated future cash flows using the current rates at which similar loans would be made to borrowers with similar credit and for the same remaining maturities.

Cash and Cash Equivalents — The carrying amount approximates fair value.

Available-for-sale Equity Investments — Available-for-sale equity investments are recorded at their fair value based on level one publicly available trading prices.

Borrowings Under Unsecured Line of Credit Arrangements — The carrying amount of the unsecured line of credit arrangements approximates fair value becarborrowings are interest rate adjustable.

Senior Unsecured Notes — The fair value of the senior unsecured notes payable was estimated based on level one publicly available trading prices.

Secured Debt — The fair value of fixed rate secured debt is estimated using level two inputs by discounting the estimated future cash flows using the current rates at similar loans would be made with similar credit ratings and for the same remaining maturities. The carrying amount of variable rate secured debt approximates fai because the borrowings are interest rate adjustable.

Interest Rate Swap Agreements — Interest rate swap agreements are recorded in other assets or other liabilities on the balance sheet at fair market value. Fair market vestimated using level two inputs by utilizing pricing models that consider forward yield curves and discount rates.

Foreign Currency Forward Contracts — Foreign currency forward contracts are recorded in other assets or other liabilities on the balance sheet at fair market value market value is determined using level two inputs by estimating the future value of the currency pair based on existing exchange rates, comprised of current spot and forward points, and calculating a present value of the net amount using a discount factor based on observable traded interest rates.

The carrying amounts and estimated fair values of our financial instruments are as follows (in thousands):

U.S. GAAP provides authoritative guidance for measuring and disclosing fair value measurements of assets and liabilities. The guidance defines fair value as the ex price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an transaction between market participants on the measurement

date. The guidance also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable input measuring fair value. The guidance describes three levels of inputs that may be used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Please see Note 2 to the fi statements included in our Annual Report on Form 10-K for the year ended December 31, 2012 for additional information.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Items Measured at Fair Value on a Recurring Basis

The market approach is utilized to measure fair value for our financial assets and liabilities reported at fair value on a recurring basis. The market approach uses prices other relevant information generated by market transactions involving identical or comparable assets or liabilities.

| | | | | | | | | |

⁽¹⁾ Unrealized gains or losses on equity investments are recorded in accumulated other comprehensive income (loss) at each measurement date.

Items Measured at Fair Value on a Nonrecurring Basis

In addition to items that are measured at fair value on a recurring basis, we also have assets and liabilities in our balance sheet that are measured at fair value nonrecurring basis. As these assets and liabilities are not measured at fair value on a recurring basis, they are not included in the tables above. Assets, liabilit noncontrolling interests that are measured at fair value on a nonrecurring basis include those acquired/assumed in business combinations (see Note 3) and asset impai (if applicable, see Note 5 for impairments of real property and Note 6 for impairments of loans receivable). We have determined that the fair value measurements in each of these assets and liabilities rely primarily on Company-specific inputs and our assumptions about the use of the assets and settlement of liabilities, as obsinguts are not available. As such, we have determined that each of these fair value measurements generally reside within Level 3 of the fair value hierarchy. We estimate of real estate and related intangibles using the income approach and unobservable data such as net operating income and estimated capitalization and d rates. We also consider local and national industry market data including comparable sales, and commonly engage an external real estate appraiser to assist us estimation of fair value. We estimate the fair value of assets held for sale based on current sales price expectations or, in the absence of such price expectations, I inputs described above. We estimate the fair value of secured debt assumed in business combinations using current interest rates at which similar borrowings of obtained on the transaction date.

17. Segment Reporting

We invest in seniors housing and health care real estate. We evaluate our business and make resource allocations on our five operating segments: seniors housing t net, seniors housing operating, medical office buildings, hospitals and life science. Our seniors housing triple-net properties include skilled nursing/post-acute facilitia assisted living facilities, independent living/continuing care retirement communities and combinations thereof. Under the seniors housing triple-net segment, we inveseniors housing and health care real estate through acquisition and financing of primarily single tenant properties. Properties acquired are primarily leased under tripla leases and we are not involved in the management of the property. Our seniors housing operating properties include seniors housing communities that are owned and/operated through RIDEA structures (see Notes 3 and 18).

Our medical facility properties include medical office buildings, hospitals and life science buildings which are aggregated into our medical facilities reportable seg Our medical office buildings are typically leased to multiple tenants and generally require a

⁽²⁾ Please see Note 11 for additional information.

certain level of property management. Our hospital investments are leased and we are not involved in the management of the property. Our life science investment represents an investment in an unconsolidated entity (see Note 7).

The accounting policies of the segments are the same as those described in the summary of significant accounting policies (see Note 2 to the financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2012). The results of operations for all acquisitions described in Note 3 are included ir consolidated results of operations from the acquisition dates and are components of the appropriate segments. There are no intersegment sales or transfers.

We evaluate performance based upon net operating income from continuing operations ("NOI") of each segment. We define NOI as total revenues, including tenal reimbursements, less property level operating expenses, which exclude depreciation and amortization, general and administrative expenses, transaction costs, provisic loan losses and interest expense. We believe NOI provides investors relevant and useful information because it measures the operating performance of our properties property level on an unleveraged basis. We use NOI to make decisions about resource allocations and to assess the property level performance of our properties.

Non-segment revenue consists mainly of interest income on non-real estate investments and other income. Non-segment assets consist of corporate assets includin deferred loan expenses and corporate offices and equipment among others. Non-property specific revenues and expenses are not allocated to individual segments in determining NOI.

18. Income Taxes and Distributions

We elected to be taxed as a REIT commencing with our first taxable year. To qualify as a REIT for federal income tax purposes, at least 90% of taxable income (excluding 100% of net capital gains) must be distributed to stockholders. REITs that do not distribute a certain amount of current year taxable income in the current year also subject to a 4% federal excise tax. The main differences between undistributed net income for federal income tax purposes and financial statement purposes recognition of straight-line rent for reporting purposes, basis differences in acquisitions, recording of impairments, differing useful lives and depreciation and amortiz methods for real property and the provision for loan losses for reporting purposes versus bad debt expense for tax purposes.

Under the provisions of the REIT Investment Diversification and Empowerment Act of 2007 ("RIDEA"), for taxable years beginning after July 30, 2008, the REIT lease "qualified health care properties" on an arm's-length basis to a taxable REIT subsidiary ("TRS") if the property is operated on behalf of such subsidiary by a per who qualifies as an "eligible independent contractor." Generally, the rent received from the TRS will meet the related party rent exception and will be treated as "rent real property." A "qualified health care property" includes real property and any personal property that is, or is necessary or incidental to

the use of, a hospital, nursing facility, assisted living facility, congregate care facility, qualified continuing care facility, or other licensed facility which extends medic nursing or ancillary services to patients. We have entered into various joint ventures that were structured under RIDEA. Resident level rents and related operating expenses for these facilities are reported in the consolidated financial statements and are sub federal taxes as the operations of such facilities are included in a TRS. Certain net operating loss carryforwards could be utilized to offset taxable income in future year.

Our consolidated provision for income taxes for the three months ended March 31, 2013 and 2012 was \$2,763,000 and \$1,470,000, respectively. Income tax expereflected in the financial statements primarily represents U.S. federal and state and local income taxes as well as non-U.S. income taxes on certain investments located

Net deferred tax liabilities with respect to our TRS entities totaled \$1,333,000 and \$1,419,000 as of March 31, 2013 and December 31, 2012, respectively, and rel primarily to differences between the financial reporting and tax bases of fixed and intangible assets and to net operating losses.

Generally, we are subject to audit under the statute of limitations by the Internal Revenue Service ("IRS") for the year ended December 31, 2008 and subsequent y and are subject to audit by state taxing authorities for the year ended December 31, 2007 and subsequent years. In the future, we will be subject to audit by the Canac Revenue Agency ("CRA") and provincial authorities generally for periods subsequent to our Chartwell investment in May 2012 related to entities acquired or formed connection with the investments, and by HM Revenue & Customs for periods subsequent to our Sunrise-related acquisitions in August 2012 related to entities acquire formed in connection with the acquisitions.

We apply the rules under ASC 740-10 "Accounting for Uncertainty in Income Taxes" for uncertain tax positions using a "more likely than not" recognition threshed tax positions. Pursuant to these rules, we will initially recognize the financial statement effects of a tax position when it is more likely than not, based on the technical of the tax position, that such a position will be sustained upon examination by the relevant tax authorities. If the tax benefit meets the "more likely than not" threshold measurement of the tax benefit will be based on our estimate of the ultimate tax benefit to be sustained if audited by the taxing authority.

Of the total \$6,101,000 of total liability for gross unrecognized tax benefits at December 31, 2012, \$5,916,000 (exclusive of accrued interest and penalties) relates April 1, 2011 Genesis HealthCare Corporation transaction ("Genesis Acquisition") and is included in accrued expenses and other liabilities on the consolidated balance sheet. As a part of the Genesis Acquisition, we received a full indemnification from FC-GEN Operations Investment, LLC covering income taxes or other taxes as we interest and penalties relating to tax positions taken by FC-GEN Operations Investment, LLC prior to the acquisition. Accordingly, an offsetting indemnification asset recorded in receivables and other assets on the consolidated balance sheet. Such indemnification asset is reviewed for collectability periodically.

Unrecognized tax benefits, as currently accrued for, have an immaterial impact on the effective tax rate to the extent that would be recognized. There were insigni uncertain tax positions as of March 31, 2013 for which it is reasonably possible that the amount of unrecognized tax benefits would decrease during 2013. Interest an penalties totaled \$33,000 and \$98,000, respectively, for the three months ended March 31, 2013 and are included in income tax expense. Of these amounts, \$29,000 at \$88,000 of interest and penalties, respectively, relate to the Genesis Acquisition and are offset by the indemnification asset.

Business Strategy

Our primary objectives are to protect stockholder capital and enhance stockholder value. We seek to pay consistent cash dividends to stockholders and create opportunities to increase dividend payments to stockholders as a result of annual increases in net operating income and portfolio growth. To meet these objectives, we across the full spectrum of seniors housing and health care real estate and diversify our investment portfolio by property type, customer and geographic location.

Substantially all of our revenues are derived from operating lease rentals, resident fees and services, and interest earned on outstanding loans receivable. These iter represent our primary sources of liquidity to fund distributions and depend upon the continued ability of our obligors to make contractual rent and interest payments t and the profitability of our operating properties. To the extent that our customers/partners experience operating difficulties and become unable to generate sufficient c make payments to us, there could be a material adverse impact on our consolidated results of operations, liquidity and/or financial condition. To mitigate this risk, we monitor our investments through a variety of methods determined by the type of property. Our proactive and comprehensive asset management process for seniors ho properties generally includes review of monthly financial statements and other operating data for each property, review of obligor/partner creditworthiness, property inspections, and review of covenant compliance relating to licensure, real estate taxes, letters of credit and other collateral. Our internal property management division actively manages and monitors the medical office building portfolio with a comprehensive process including tenant relations, lease expirations, the mix of health serv providers, hospital/health system relationships, property performance, capital improvement needs, and market conditions among other things. In monitoring our portf our personnel use a proprietary database to collect and analyze property-specific data. Additionally, we conduct extensive research to ascertain industry trends. We exthe operating environment in each property's market to determine the likely trend in operating performance of the facility. When we identify unacceptable trends, we to mitigate, eliminate or transfer the risk. Through these efforts, we are generally able to intervene at an early stage to address any negative trends, and in so doing, su both the collectability of revenue an

In addition to our asset management and research efforts, we also structure our investments to help mitigate payment risk. Operating leases and loans are normally enhanced by guaranties and/or letters of credit. In addition, operating leases are typically structured as master leases and loans are generally cross-defaulted and cross collateralized with other real estate loans, operating leases or agreements between us and the obligor and its affiliates.

For the three months ended March 31, 2013, rental income, resident fees and services and interest and other income represented 47%, 51%, and 2% respectively, c revenues (including discontinued operations). Substantially all of our operating leases are designed with escalating rent structures. Leases with fixed annual rental escalators are generally recognized on a straight-line basis over the initial lease period, subject to a collectability assessment. Rental income related to leases with con rental escalators is

generally recorded based on the contractual cash rental payments due for the period. Our yield on loans receivable depends upon a number of factors, including the st interest rate, the average principal amount outstanding during the term of the loan and any interest rate adjustments.

Our primary sources of cash include rent and interest receipts, resident fees and services, borrowings under our primary unsecured line of credit arrangement, publ issuances of debt and equity securities, proceeds from investment dispositions and principal payments on loans receivable. Our primary uses of cash include dividend distributions, debt service payments (including principal and interest), real property investments (including acquisitions, capital expenditures, construction advances ϵ transaction costs), loan advances, property operating expenses and general and administrative expenses. Depending upon the availability and cost of external capital, believe our liquidity is sufficient to fund these uses of cash.

We also continuously evaluate opportunities to finance future investments. New investments are generally funded from temporary borrowings under our primary unsecured line of credit arrangement, internally generated cash and the proceeds from investment dispositions. Our investments generate cash from net operating incc and principal payments on loans receivable. Permanent financing for future investments, which replaces funds drawn under our primary unsecured line of credit arrangement, has historically been provided through a combination of the issuance of public debt and equity securities and the incurrence or assumption of secured de

Depending upon market conditions, we believe that new investments will be available in the future with spreads over our cost of capital that will generate appropriate turns to our stockholders. It is also possible that investment dispositions may occur in the future. To the extent that investment dispositions exceed new investments revenues and cash flows from operations could be adversely affected. We expect to reinvest the proceeds from any investment dispositions in new investments. To the extent that new investment requirements exceed our available cash on-hand, we expect to borrow under our primary unsecured line of credit arrangement. At March 3 2013, we had \$269,842,000 of cash and cash equivalents, \$225,360,000 of restricted cash and \$1,550,000,000 of available borrowing capacity under our primary unseline of credit arrangement.

Capital Market Outlook

The capital markets remain supportive of our investment strategy. For the year ended December 31, 2012, we raised over \$6.0 billion in aggregate gross proceeds through issuance of common and preferred stock, unsecured debt and a Canadian denominated term loan. During the three months ended March 31, 2013, we funded \$500 million unsecured term loan and expanded our primary unsecured line of credit arrangement to \$2.25 billion. The capital raised, in combination with available and borrowing capacity under our line of credit, supported \$4.9 billion in gross new investments during 2012 and \$2.6 billion year-to-date in 2013. We expect attract investment opportunities to remain available in the future as we continue to leverage the benefits of our relationship investment strategy.

Key Transactions in 2013

Capital. In January 2013, we closed a \$2.75 billion unsecured line of credit arrangement consisting of a \$2.25 billion revolver and a \$500 million term loan. The facil replaced our existing \$2.0 billion unsecured line of credit arrangement. The revolver matures on March 31, 2017, but can be extended for an additional year at our option. term loan matures on March 31, 2016, but can be extended up to two years at our option. The revolver bears interest at LIBOR plus 117.5 basis points and has an annual fee of 22.5 basis points. The term loan bears interest at LIBOR plus 135 basis points. We have an option to upsize the facility by up to an additional \$1.0 billion through accordion feature, allowing for aggregate commitments of up to \$3.75 billion. The facility also allows us to borrow up to \$500 million in alternate currencies.

Key Performance Indicators, Trends and Uncertainties

We utilize several key performance indicators to evaluate the various aspects of our business. These indicators are discussed below and relate to operating perform concentration risk and credit strength. Management uses these key performance indicators to facilitate internal and external comparisons to our historical operating re in making operating decisions and for budget planning purposes.

Operating Performance. We believe that net income attributable to common stockholders ("NICS") is the most appropriate earnings measure. Other useful supple measures of our operating performance include funds from operations ("FFO"), net operating income from continuing operations ("NOI") and same store cas ("SSCNOI"); however, these supplemental measures are not defined by U.S. generally accepted accounting principles ("U.S. GAAP"). Please refer to the section ("Non-GAAP Financial Measures" for further discussion and reconciliations of FFO, NOI and SSCNOI. These earnings measures and their relative per share amou widely used by investors and analysts in the valuation, comparison and investment recommendations of companies. The following table reflects the recent historical of our operating performance measures for the periods presented (in thousands):

⁽²⁾ Represents annualized contractual or projected income to be received in cash divided by investment amounts.

Concentration Risk. We evaluate our concentration risk in terms of asset mix, investment mix, customer mix and geographic mix. Concentration risk is a valuable measure in understanding what portion of our investments could be at risk if certain sectors were to experience downturns. Asset mix measures the portion of our investments that are real property. In order to qualify as an equity REIT, at least 75% of our real estate investments must be real property whereby each property, whici includes the land, buildings, improvements, intangibles and related rights, is owned by us. Investment mix measures the portion of our investments that relate to our top five relationships. Geographic mix measures the portion of our investments that relate to our top five states (or international equivalents). The following table reflects our recent historical trends of concentration risk by investment balance for periods presented:

Credit Strength. We measure our credit strength both in terms of leverage ratios and coverage ratios. The leverage ratios indicate how much of our balance sheet capitalization is related to long-term debt. The coverage ratios indicate our ability to service interest and fixed charges (interest, secured debt principal amortization at preferred dividends). We expect to maintain capitalization ratios and coverage ratios sufficient to maintain compliance with our debt covenants. The coverage ratios a based on earnings before interest, taxes, depreciation and amortization ("EBITDA") which is discussed in further detail, and reconciled to net income, below in "Non GAAP Financial Measures." Leverage ratios and coverage ratios are widely used by investors, analysts and rating agencies in the valuation, comparison, investment recommendations and rating of companies. We evaluate our key performance indicators in conjunction with current expectations to determine if historical trends are indicative of future results. Our expected may not be achieved and actual results may differ materially from our expectations. Factors that may cause actual results to differ from expected results are described more detail in "Forward-Looking Statements and Risk Factors" and other sections of this Quarterly Report on Form 10-Q. Management regularly monitors economic other factors to develop strategic and tactical plans designed to improve performance and maximize our competitive position. Our ability to achieve our financial obje is dependent upon our ability to effectively execute these plans and to appropriately respond to emerging economic and company-specific trends. Please refer to our #Report on Form 10-K for the year ended December 31, 2012, under the headings "Business," "Risk Factors" and "Management's Discussion and Analysis of Financia Condition and Results of Operations" for further discussion of these risk factors.

We have \$5,894,403,000 of senior unsecured notes principal outstanding with annual fixed interest rates ranging from 3.0% to 6.5%, payable semi-annually. A tot \$494,403,000 of our senior unsecured notes are convertible notes that also contain put features. In addition, we have a \$250,000,000 Canadian denominated unsecure loan (approximately \$245,724,000 USD at exchange rates on March 31, 2013). The loan matures on July 27, 2015 with an option to extend for an additional year at a discretion. We also have a \$500,000,000 unsecured term loan that matures on March 16, 2016 and can be extended for two additional years at our option. See Note 1 our unaudited consolidated financial statements for more information. Total contractual interest obligations on senior unsecured notes, the Canadian term loan and th \$500,000,000 term loan totaled \$2,717,307,000 at March 31, 2013.

We have consolidated secured debt with total outstanding principal of \$2,425,033,000, collateralized by owned properties, with fixed annual interest rates ranging 0.4% to 8.0%, payable monthly. The carrying values of the properties securing the debt totaled \$4,157,430,000 at March 31, 2013. Total contractual interest obligatio consolidated secured debt totaled \$712,122,000 at March 31, 2013. Additionally, our share of non-recourse debt associated with unconsolidated entities (as reflected contractual obligations table above) is \$711,388,000 at March 31, 2013. Our share of contractual interest obligations on our unconsolidated entities' secured debt is \$120,291,000 at March 31, 2013.

At March 31, 2013, we had operating lease obligations of \$698,039,000 relating primarily to ground leases at certain of our properties and office space leases and lease obligations of \$83,499,000 relating to certain leased investment properties that contain bargain purchase options.

Purchase obligations include unfunded construction commitments and contingent purchase obligations. At March 31, 2013, we had outstanding construction financ of \$86,820,000 for leased properties and were committed to providing additional financing of approximately \$217,172,000 to complete construction. At March 31, 20 we had contingent purchase obligations totaling \$73,957,000. These contingent purchase obligations relate to unfunded capital improvement obligations and continge obligations on acquisitions. Upon funding, amounts due from the tenant are increased to reflect the additional investment in the property.

Other long-term liabilities relate to our Supplemental Executive Retirement Plan, which is discussed in Note 19 to the financial statement included in our Annual I on Form 10-K for the year ended December 31, 2012.

Capital Structure

Please refer to "Credit Strength" above for a discussion of our leverage and coverage ratio trends. Our debt agreements contain various covenants, restrictions events of default. Certain agreements require us to maintain certain financial ratios and minimum net worth and impose certain limits on our ability to incur indebtedr create liens and make investments or acquisitions. As of March 31, 2013, we were in compliance with all of the covenants under our debt agreements. Please refer to section entitled "Non-GAAP Financial Measures" for further discussion. None of our debt agreements contain provisions for acceleration which could be triggered by debt ratings. However, under our primary unsecured line of credit arrangement, the ratings on our senior unsecured notes are used to determine the fees and interest charged. A summary of certain covenants and our results as of March 31, 2013 is as follows:

Per Agreement

We plan to manage the company to maintain compliance with our debt covenants and with a capital structure consistent with our current profile. Any downgrades terms of ratings or outlook by any or all of the rating agencies could have a material adverse impact on our cost and availability of capital, which could in turn have a material adverse impact on our consolidated results of operations, liquidity and/or financial condition.

On May 4, 2012, we filed an open-ended automatic or "universal" shelf registration statement with the Securities and Exchange Commission covering an indeterm amount of future offerings of debt securities, common stock, preferred stock, depositary shares, warrants and units. As of April 30, 2013, we had an effective registral statement on file in connection with our enhanced dividend reinvestment plan under which we may issue up to 10,000,000 shares of common stock. As of April 30, 2 3,103,084 shares of common stock remained available for issuance under this registration statement. We have entered into separate Equity Distribution Agreements we each of UBS Securities LLC, RBS Securities Inc., KeyBanc Capital Markets Inc. and Credit Agricole Securities (USA) Inc. relating to the offer and sale from time to of up to \$630,015,000 aggregate amount of our common stock ("Equity Shelf Program"). As of April 30, 2013, we had \$457,112,000 of remaining capacity under the Equity Shelf Program. Depending upon market conditions, we anticipate issuing securities under our registration statements to invest in additional properties and to reborrowings under our unsecured line of credit arrangements.

Results of Operations

Summary

Our primary sources of revenue include rent and resident fees and services. Our primary expenses include interest expense, depreciation and amortization, property operating expenses, transaction costs and general and administrative expenses. We evaluate our business and make resource allocations on our three business segments seniors housing triple-net, seniors housing operating and medical facilities. The primary performance measures for our properties are NOI and SSCNOI, which are discussed below. Please see Note 17 to our consolidated financial statements for additional information. The increase in rental income is primarily attributable to the acquisitions of new properties and the conversion of newly constructed seniors housing triple-net prof from which we receive rent. Certain of our leases contain annual rental escalators that are contingent upon changes in the Consumer Price Index and/or changes in the operating revenues of the tenant's properties. These escalators are not fixed, so no straight-line rent is recorded; however, rental income is recorded based on the cont cash rental payments due for the period. If gross operating revenues at our facilities and/or the Consumer Price Index do not increase, a portion of our revenues may continue to increase. Sales of real property would offset revenue increases and, to the extent that they exceed new acquisitions, could result in decreased revenues. C leases could renew above or below current rent rates, resulting in an increase or decrease in rental income. For the three months ended March 31, 2013, we had no le renewals but we had 14 leases with rental rate increasers ranging from 0.15% to 0.41% in our seniors housing triple-net portfolio. The decrease in interest income is attributable to loan payoffs (see Note 6 to our consolidated financial statements for additional information).

⁽²⁾ Primarily due to acquisitions of 65 properties and conversions of 15 construction projects into revenue-generating properties subsequent to January 1, 2012.

Interest expense for the years ended March 31, 2013 and 2012 represents \$6,829,000 and \$3,533,000, respectively, of secured debt interest expense offset by interest allocated to discontinued operations. The change in secured debt interest expense is due to the net effect and timing of assumptions, extinguishments and principal amortizations. The following is a summary of our seniors housing triple-net property secured debt principal activity (dollars in thousands):

Depreciation and amortization increased primarily as a result of new property acquisitions and the conversions of newly constructed investment properties. To the that we acquire or dispose of additional properties in the future, our provision for depreciation and amortization will change accordingly.

Transaction costs represent costs incurred with property acquisitions (including due diligence costs, fees for legal and valuation services, and termination of pre-ex relationships computed based on the fair value of the assets acquired), lease termination fees and other similar costs.

Changes in gains on sales of properties are related to property sales which totaled 11 and 0 for the three months ended March 31, 2013 and 2012, respectively. The following illustrates the reclassification impact as a result of classifying the properties sold prior to or held for sale at March 31, 2013 as discontinued operations for t periods presented. As discussed in Note 3 to our consolidated financial statements, we completed additional acquisitions within our seniors housing operating segment during the thr months ended March 31, 2013. The results of operations for these properties have been included in our consolidated results of operations from the dates of acquisition seniors housing operating acquisitions were structured under RIDEA, which is discussed in Note 18 to our consolidated financial statements. When considering new acquisitions utilizing the RIDEA structure, we look for opportunities with best-in-class operators with a strong seasoned leadership team, high-quality real estate in attractive markets, growth potential above the standard rent escalators in our triple-net lease seniors housing portfolio, and alignment of economic interests with our operating partner. Our seniors housing operating properties offer us the opportunity for external growth because we have the right to fund future seniors housing inve opportunities sourced by our operating partners. There were no seniors housing operating segment investments prior to September 1, 2010. As such, the increases in 1 are almost entirely attributable to 98 property acquisitions that have occurred subsequent to March 31, 2012. Fluctuations in revenues and property operating expenses are primarily a result of acquisitions subsequent to September 30, 2010. Interest income relates to the Su loan funded during the three months ended December 31, 2012. The fluctuations in depreciation and amortization are due to acquisitions and variations in amortizatic short-lived intangible assets. To the extent that we acquire or dispose of additional properties in the future, these amounts will change accordingly. Loss from unconsolidated entities during the three months ended March 31, 2013 is primarily attributable to depreciation and amortization of short-lived intangible assets related

The increase in rental income is primarily attributable to the acquisitions of new properties and the construction conversions of medical facilities from which we re rent. Certain of our leases contain annual rental escalators that are contingent upon changes in the Consumer Price Index. These escalators are not fixed, so no straigl rent is recorded; however, rental income is recorded based on the contractual cash rental payments due for the period. If the Consumer Price Index does not increase, portion of our revenues may not continue to increase. Sales of real property would offset revenue increases and, to the extent that they exceed new acquisitions, could in decreased revenues. Our leases could renew above or below current rent rates, resulting in an increase or decrease in rental income. For the three months ended M 31, 2013, our consolidated medical office building portfolio signed 68,659 square feet of new leases and 163,638 square feet of renewals. The weighted-average term these leases was seven years, with a rate of \$20.34 per square foot and tenant improvement and lease commission costs of \$17.02 per square foot. Substantially all

of these leases during the referenced quarter contain an annual fixed or contingent escalation rent structure ranging from the change in CPI to 3%. For the three mont ended March 31, 2013, we had no lease renewals and no rental rate increasers in our hospital portfolio.

Interest expense for the three months ended March 31, 2013 and 2012 represents \$9,733,000 and \$10,238,000, respectively, of secured debt interest expense offset interest allocated to discontinued operations. The change in secured debt interest expense is primarily due to the net effect and timing of assumptions, extinguishmen principal amortizations. The increase in property operating expenses and depreciation and amortization is primarily attributable to acquisitions and construction conversions of new medical facilities for which we incur certain property operating expenses offset by property operating expenses associated with discontinued operations. Transaction costs for three months ended March 31, 2012 represent costs incurred in connection with the acquisition of new properties. Income from unconsolidated entities includes our so finet income related to our joint venture investment with Forest City Enterprises and certain unconsolidated property investments related to our strategic joint ventur relationship with a national medical office building company. See Note 7 to our consolidated financial statements for additional information.

Changes in gains/losses on sales of properties is related to property sales which totaled six and four for the three months ended March 31, 2013, and 2012, respectively following illustrates the reclassification impact as a result of classifying the properties sold prior to or held for sale at March 31, 2013 as discontinued operations for the presented. Please refer to Note 5 to our consolidated financial statements for further discussion.

The change in interest expense on senior unsecured notes is due to the net effect of issuances and extinguishments. Please refer to Note 10 of our consolidated final statements for additional information. We capitalize certain interest costs associated with funds used for the construction of properties owned directly by us. The amount capitalized is based upon the balances outstanding during the construction period using the rate of interest that approximates our cost of financing. Our interest expended by the amount capitalized. Please see Note 11 to our consolidated financial statements for a discussion of our interest rate swap agreements and their impact interest expense. Loan expense represents the amortization of deferred loan costs incurred in connection with the issuance and amendments of debt. Loan expense chared ue to amortization of charges for costs incurred for senior unsecured note issuance. The change in interest expense on the unsecured line of credit arrangements primarily to the net effect and timing of draws, paydowns and variable interest rate changes. Please refer to Note 9 of our consolidated financial statements for addition information regarding our unsecured line of credit arrangements.

General and administrative expenses as a percentage of consolidated revenues (including revenues from discontinued operations) for the three months ended Marc 2013 and 2012 were 4.46% and 6.37%, respectively. The increase in general and administrative expenses is primarily related to costs associated with our initiatives to attract and retain appropriate personnel to achieve our business objectives. The decline in percent of revenue is primarily related to the increasing revenue base as a rof our acquisitions.

The changes in preferred stock dividends are primarily attributable to the net effect of issuances, redemptions and conversions. Please see Note 13 to our consolid financial statements for additional information.

Non-GAAP Financial Measures

We believe that net income, as defined by U.S. GAAP, is the most appropriate earnings measurement. However, we consider FFO to be a useful supplemental mea our operating performance. Historical cost accounting for real estate assets in accordance with U.S. GAAP implicitly assumes that the value of real estate assets dimin predictably over time as evidenced by the provision for depreciation. However, since real estate values have historically risen or fallen with market conditions, many industry investors and analysts have considered presentations of operating results for real estate companies that use historical cost accounting to be insufficient. In res the National Association of Real Estate Investment Trusts ("NAREIT") created FFO as a supplemental measure of operating performance for REITs that excludes his cost depreciation from net income. FFO, as defined by NAREIT, means net income, computed in accordance with U.S. GAAP, excluding gains (or losses) from sales estate and impairment of depreciable assets, plus depreciation and amortization, and after adjustments for unconsolidated entities.

Net operating income from continuing operations ("NOI") is used to evaluate the operating performance of our properties. We define NOI as total revenues, include tenant reimbursements, less property level operating expenses, which exclude depreciation and amortization, general and administrative expenses, impairments and in expense. Property operating expenses represent costs associated with managing, maintaining and servicing tenants for our seniors housing operating and medical facily properties. These expenses include, but are not limited to, property-related payroll and benefits, property management fees, marketing, housekeeping, food service, maintenance, utilities, property taxes and insurance. General and administrative expenses represent costs unrelated to property operations or transaction costs. These expenses include, but are not limited to, payroll and benefits, professional services, office expenses and depreciation of corporate fixed assets. Same store cash NOI ("SSCNOI") is used to evaluate the cash-based operating performance of our properties under a consistent population which eliminates changes in the composition of portfolio. As used herein, same store is generally defined as those revenue-generating properties in the portfolio for the reporting period subsequent to January 1, 201 Any properties acquired, developed, transitioned or classified in discontinued operations during that period are excluded from the same store amounts. We believe Noise Science in the property level on an unleveraged We use NOI and SSCNOI to make decisions about resource allocations and to assess the property level performance of our properties.

EBITDA stands for earnings before interest, taxes, depreciation and amortization. We believe that EBITDA, along with net income and cash flow provided from operating activities, is an important supplemental measure because it provides additional information to assess and evaluate the performance of our operations. We prutilize EBITDA to measure our interest coverage ratio, which represents EBITDA divided by total interest, and our fixed charge coverage ratio, which represents EBI divided by fixed charges. Fixed charges include total interest, secured debt principal amortization and preferred dividends.

A covenant in our primary unsecured line of credit arrangement and Canadian denominated term loan contains a financial ratio based on a definition of EBITDA t specific to that agreement. Failure to satisfy these covenants could result in an event of default that could have a material adverse impact on our cost and availability capital, which could in turn have a material adverse impact on our consolidated results of operations, liquidity and/or financial condition. Due to the materiality of the debt agreements and the financial covenants, we have disclosed Adjusted EBITDA, which represents EBITDA as defined above and adjusted for stock-based comper expense, provision for loan losses and gain/loss on extinguishment of debt. We use Adjusted EBITDA to measure our adjusted fixed charge coverage ratio, which rep Adjusted EBITDA divided by fixed charges on a trailing twelve months basis. Fixed charges include total interest (excluding capitalized interest and non-cash interes expenses), secured debt principal amortization and preferred dividends. Our covenant requires an adjusted fixed charge ratio of at least 1.50 times.

Other than Adjusted EBITDA, our supplemental reporting measures and similarly entitled financial measures are widely used by investors, equity and debt analys rating agencies in the valuation, comparison, rating and investment recommendations of companies. Management uses these financial measures to facilitate internal a external comparisons to our historical operating results and in making operating decisions. Additionally, these measures are utilized by the Board of Directors to evalumanagement. Adjusted EBITDA is used solely to determine our compliance with a financial covenant in our primary line of credit arrangement and Canadian denomenterm loan and is not being presented for use by investors for any other purpose. None of our supplemental measures represent net income or cash flow provided from operating activities as determined in accordance with U.S. GAAP and should not be considered as alternative measures of profitability or liquidity. Finally, the supple measures, as defined by us, may not be comparable to similarly entitled items reported by other real estate investment trusts or other companies.

The table below reflects the reconciliation of FFO to net income attributable to common stockholders, the most directly comparable U.S. GAAP measure, for the presented. The provisions for depreciation and amortization include provisions for depreciation and amortization from discontinued operations. Noncontrolling intere amounts represent the noncontrolling interests' share of transaction costs and depreciation and amortization. Unconsolidated entity amounts represent our share of unconsolidated entities' depreciation and amortization. Amounts are in thousands except for per share data.

Health Care Reimbursements

Policy and legislative changes that increase or decrease government reimbursement impact our operators and tenants that participate in Medicare, Medicaid or othe government programs. To the extent that policy or legislative changes decrease government reimbursement to our operators and tenants, our revenue and operations indirectly adversely affected.

On May 2, 2013 the Centers for Medicare and Medicaid Services ("CMS") issued its proposed rule for the skilled nursing prospective payment system, which sets proposed payment rate changes for the 2014 fiscal year. Based on CMS's proposed rule for fiscal year 2014, SNFs will receive a net payment increase of 1.4%, which based on a 2.3% increase in the SNF market basket, less a 0.5% forecast error adjustment, and less a 0.4% multi-factor productivity adjustment. CMS proposes to implement a forecast error adjustment because the forecasted fiscal year 2012 market basket percentage change exceeded the actual SNF market basket percentage change

On November 21, 2011, the Joint Select Committee on Deficit Reduction, which was created by the Budget Control Act of 2011, concluded its work, and issued a statement that it was not able to make a bipartisan agreement, thus triggering the sequestration process. On January 2, 2013, President Obama signed into law the An Taxpayer Relief Act of 2012 ("Taxpayer Relief Act"), which delayed the sequestration process until March 1, 2013. While the sequester went into effect March 1, 20 effective April 1, 2013, provider payments under Medicare Parts A and B, Medicare Advantage, and Medicare Part D, will be reduced up to 2% annually.

The Balanced Budget Act of 1997 mandated caps on Medicare reimbursement for certain therapy services. However, Congress imposed various waivers on the implementation of those caps. The Middle Class Tax Relief and Job Creation Act of 2012 ("Job Creation Act") made a number of changes effective on October 1, 20 including applying the therapy caps to outpatient hospitals, creating two new threshold amounts of \$3,700 (one for each therapy cap amount), and requiring a manual medical review process of claims over these new thresholds. CMS announced on March 1, 2013 that until the agency provides further guidance, all therapy claims the suspended for Manual Medical Review of Therapy Services above the \$3,700 threshold will be subject to prepayment medical review. The Taxpayer Relief Act extens the Job Creation Act provisions related to payment for Medicare outpatient therapy services and extended the historical therapy cap waiver and exceptions process the December 31, 2013. The Taxpayer Relief Act also increased the multiple procedure discount for Medicare Part B therapy services from 25% to 50% effective April 1 2013, which will lower revenues for certain operators or tenants.

CMS annually adjusts the Medicare Physician Fee Schedule payment rates based on an update formula that includes application of the Sustainable Growth Rate ("SGR"). On November 1, 2012, CMS published the calendar year 2013 Physician Fee Schedule final rule that called for a negative 26.5% update under the statutory formula. The Taxpayer Relief Act provided for a zero percent update, blocking this cut through December 31, 2013. In March 2013, CMS estimated that the SGR fo calendar year 2014 will be negative 15.2%. Additionally, House Energy and Commerce and Ways and Means panels released a plan in April 2013 to eliminate the SG updates and emphasized the importance of tailoring a permanent fix for different medical specialties. The House panels requested comments on their proposal but ha yet adopted a plan to eliminate the SGR.

Medicaid is a major payor source for residents in our skilled nursing facilities and hospitals. The federal and state government share responsibility for financing Medicaid. President Obama's proposed fiscal year budget for 2013 included several proposals that would have lowered federal spending for Medicaid, potentially impacting provider Medicaid reimbursement rates. The proposals included new limits on state provider taxes, phasing down the existing Medicaid provider tax, and blending the Federal matching rate for state Medicaid and the Children's Health Insurance Program. Although the President's proposed fiscal year budget for 2014 di include these proposals, it nevertheless called for an overall reduction in federal health care spending by \$401 billion over ten years, with savings stemming from sevents-saving proposals including reduced Medicare payments for long-term care hospitals, skilled nursing facilities, and other post-acute care providers.

On April 26, 2013, CMS issued its proposed rule for the Inpatient Prospective Payment System, which sets forth proposed acute care and long-term care hospital payment rate changes for the 2014 fiscal year. Based on CMS's proposed rule for fiscal year 2014, the Medicare rates for acute care hospitals will increase by 0.8% a rates for hospitals providing long-term care services will increase by 0.5%, accounting for adjustments, such as the multifactor productivity adjustment and the secon adjustment for a three-year phase-in of a one-time 3.75% budget neutrality adjustment to the long-term care hospital rate. CMS also proposes to let expire the one-ye extension of the existing moratorium on the 25% threshold policy, a policy that imposes lower Medicare payments, in certain circumstances, on those long-term care hospitals that admit more than 25% of their patients from a single acute care hospital. The expiration of the moratorium on the 25% threshold policy will impact cost reporting periods which begin on or after October 1, 2013.

Additionally, CMS proposes a number of changes to comply with the Health Reform Laws. CMS proposes to revise the reimbursement formula for disproportion share hospitals resulting in these hospitals receiving only 25% of the amount they currently receive and the remaining 75% being re-allocated to certain hospitals that provide a certain amount of uncompensated care. Additionally, beginning in fiscal year 2015, hospitals that rank among the lowest-performing 25% with regard to he acquired conditions will see a 1% reduction in Medicare payment rates. CMS also will increase the maximum payment reduction under the Hospital Readmissions Reduction program, which began on October 1, 2012, to 2% of payment amounts in fiscal year 2014. For fiscal year 2014, CMS is increasing the applicable percent reduction, the portion of Medicare payments available to fund the Value-Based Purchasing Program's value-based incentive payments, to 1.25%.

Other Related Laws

All health care providers are subject to a number of federal and state health care fraud and abuse laws, including, but not limited to, the Federal Anti-Kickback Sta which generally prohibits persons from offering, providing, soliciting, or receiving remuneration to induce either the referral of an individual or the furnishing of a go service for which payment may be made under a federal health care program, such as Medicare or Medicaid. On April 17, 2013, the Department of Health and Huma Services' Office of Inspector General ("OIG"), which is the agency charged with enforcement of the Federal Anti-Kickback Statute, released a revised provider self-disclosure protocol ("SDP"). The SDP establishes a process for providers to voluntarily identify and disclose potential cases of fraud involving federal health care programs. The SDP notes that damages calculations will begin at 1.5 times the amount actually paid by federal health care programs and that disclosing entities shou expect minimum settlement amounts of \$50,000 for kickback-related submissions and \$10,000 for all other matters eligible for disclosure under the SDP. Such settle could have an adverse effect on a property operator's liquidity and financial condition, which could negatively impact the operator's ability to make payments.

Certain provisions in the Health Insurance Portability and Accountability Act of 1996 ("HIPAA") require health care providers to utilize federally mandated stands for certain electronic transactions and maintain the privacy and security of medical records and other protected health information about individuals. Operators may 1 significant financial and criminal liability if they fail to maintain the privacy and security of medical records and other protected health information or otherwise abid applicable requirements. The Health Information Technology for Economic and Clinical Health ("HITECH") Act, passed in February 2009, strengthened the HHS Secretary's authority to impose civil money penalties for HIPAA violations occurring after February 18, 2009. In October 2009, the Office for Civil Rights ("OCR") an interim Final Rule which conformed HIPAA enforcement regulations to the HITECH Act, increasing the maximum penalty for multiple violations of a single requirement or prohibition in a calendar year to \$1.5 million. Additionally, on January 25, 2013, OCR promulgated a Final Rule, which expands the applicability of I and HITECH and strengthens the government's ability to enforce these laws. The changes also strengthen the HITECH breach

notification requirements by clarifying when breaches of unsecured health information must be reported to the Department of Health and Human Services. Generally, covered entities and business associates must come into compliance with the final rule by September 23, 2013, though some exceptions exist (e.g., a later deadline for modification of certain business associate agreements).

Critical Accounting Policies

Our consolidated financial statements are prepared in accordance with U.S. GAAP, which requires us to make estimates and assumptions. Management consider accounting estimate or assumption critical if:

- the nature of the estimates or assumptions is material due to the levels of subjectivity and judgment necessary to account for highly uncertain matters or the susceptibility of such matters to change; and
- · the impact of the estimates and assumptions on financial condition or operating performance is material.

Management has discussed the development and selection of its critical accounting policies with the Audit Committee of the Board of Directors. Management be the current assumptions and other considerations used to estimate amounts reflected in our consolidated financial statements are appropriate and are not reasonably lil change in the future. However, since these estimates require assumptions to be made that were uncertain at the time the estimate was made, they bear the risk of char actual experience differs from the assumptions and other considerations used in estimating amounts reflected in our consolidated financial statements, the resulting change are material adverse effect on our consolidated results of operations, liquidity and/or financial condition. Please refer to Note 2 to the financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2012 for further information regarding significant accounting policies that impact us. have been no material changes to these policies in 2013.

Forward-Looking Statements and Risk Factors

This Quarterly Report on Form 10-Q may contain "forward-looking" statements as defined in the Private Securities Litigation Reform Act of 1995. These forwardlooking statements concern and are based upon, among other things, the possible expansion of the company's portfolio; the sale of facilities; the performance of its operators/tenants and facilities; its ability to enter into agreements with viable new tenants for vacant space or for facilities that the company takes back from financia troubled tenants, if any; its occupancy rates; its ability to acquire, develop and/or manage facilities; its ability to make distributions to stockholders; its policies and pl regarding investments, financings and other matters; its ability to manage the risks associated with international expansion and operations; its tax status as a real estat investment trust; its critical accounting policies; its ability to appropriately balance the use of debt and equity; its ability to access capital markets or other sources of the sources and its ability to meet its earnings guidance. When the company uses words such as "may," "will," "intend," "should," "believe," "expect," "anticipate," "project," "estimate" or similar expressions, it is making forward-looking statements. Other important factors are ide in the company's Annual Report on Form 10-K for the year ended December 31, 2012, including factors identified under the headings "Business," "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations." Finally, the company assumes no obligation to update or revise any forw looking statements or to update the reasons why actual results could differ from those projected in any forward-looking statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We are exposed to various market risks, including the potential loss arising from adverse changes in interest rates and foreign currency exchange rates. We seek to mitigate the underlying foreign currency exposures with gains and losses on derivative contracts hedging these exposures. We seek to mitigate the effects of fluctuati interest rates by matching the terms of new investments with new long-term fixed rate borrowings to the extent possible. We may or may not elect to use financial derinstruments to hedge interest rate exposure. These decisions are principally based on our policy to match our variable rate investments with comparable borrowings, the also based on the general trend in interest rates at the applicable dates and our perception of the future volatility of interest rates. This section is presented to provide a discussion of the risks associated with potential fluctuations in interest rates.

We historically borrow on our primary unsecured line of credit arrangement to acquire, construct or make loans relating to health care and seniors housing propert. Then, as market conditions dictate, we will issue equity or long-term fixed rate debt to repay the borrowings under the unsecured line of credit arrangements.

A change in interest rates will not affect the interest expense associated with our fixed rate debt. Interest rate changes, however, will affect the fair value of our fix debt. Changes in the interest rate environment upon maturity of this fixed rate debt could have an effect on our future cash flows and earnings, depending on whether debt is replaced with other fixed rate debt, variable rate debt or equity or repaid by the sale of assets. To illustrate the impact of changes in the interest rate markets, w performed a sensitivity analysis on our fixed rate debt instruments whereby we modeled the change in net present values arising from a hypothetical 1% increase in ir rates to determine the instruments' change in fair value. The following table summarizes the analysis performed as of the dates indicated (in thousands):

| | March 31, 2013 | | | | December 31, 2012 | | | |
|------------------------|-----------------|----|------------|----|-------------------|----|------------|--|
| | Principal | | Change in | | Principal | | Change in | |
| | balance | | fair value | | balance | | fair value | |
| Senior unsecured notes | \$ 6,640,127 | \$ | 451,432 | \$ | 6,145,457 | \$ | 4 | |
| Secured debt | 2,138,999 | | 106,886 | | 2,024,454 | | | |
| Totals | \$ 8,779,126 | \$ | 558,318 | \$ | 8,169,911 | \$ | 5 | |

Our variable rate debt, including our unsecured line of credit arrangements, is reflected at fair value. At March 31, 2013, we had \$710,000,000 outstanding related variable rate lines of credit and \$286,727,000 outstanding related to our variable rate secured debt. Assuming no changes in outstanding balances, a 1% increase in in rates would result in increased annual interest expense of \$9,967,000. At December 31, 2012, we had no amounts outstanding under our variable rate lines of credit at \$276,006,000 outstanding related to our variable rate secured debt. Assuming no changes in outstanding balances, a 1% increase in interest rates would have resulted increased annual interest expense of \$2,760,000.

We are subject to risks associated with debt financing, including the risk that existing indebtedness may not be refinanced or that the terms of refinancing may not favorable as the terms of current indebtedness. The majority of our borrowings were completed under indentures or contractual agreements that limit the amount of indebtedness we may incur. Accordingly, in the event that we are unable to raise additional equity or borrow money because of these limitations, our ability to acquire additional properties may be limited.

For additional information regarding fair values of financial instruments, see "Item 2 — Management's Discussion and Analysis of Financial Condition and Resul Operations — Critical Accounting Policies" and Notes 11 and 16 to our unaudited consolidated financial statements.

Item 4. Controls and Procedures

Our management, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of o disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the peric covered by this Quarterly Report on Form 10-Q. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are effective in providing reasonable assurance that information required to be disclosed by us in the reports we file with or submit to the Sec and Exchange Commission ("SEC") under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules an forms. No changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) occurred during the fiscal quarter covered by Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 1. Legal Proceedings

From time to time, there are various legal proceedings pending to which we are a party or to which some of our properties are subject arising in the normal course business. We do not believe that the ultimate resolution of these proceedings will have a material adverse effect on our consolidated financial position or results of operations.

Item 1A. Risk Factors

Except as provided in "Item 2 — Management's Discussion and Analysis of Financial Condition and Results of Operations — Forward Looking Statements and R Factors," there have been no material changes from the risk factors identified under the heading "Risk Factors" in our Annual Report on Form 10-K for the year ende December 31, 2012.
