NON-GAAP FINANCIAL MEASURES

Quarter Ended June 30, 2021

NON-GAAP FINANCIAL MEASURES

We believe that revenues, net income and net income attributable to common stockholders ("NICS"), as defined by U.S. generally accepted accounting principles ("U.S. GAAP"), are the most appropriate earnings measurements. However, we consider Net Operating Income ("NOI"), In-Place NOI ("IPNOI"), Same Store NOI ("SSNOI"), Revenues per Occupied Room ("REVPOR"), Same Store REVPOR ("SS REVPOR"), Funds From Operations attributable to common stockholders ("FFO"), Normalized FFO, EBITDA and Adjusted EBITDA to be useful supplemental measures of our operating performance. Excluding EBITDA and Adjusted EBITDA, these supplemental measures are disclosed on our pro rata ownership basis. Pro rata amounts are derived by reducing consolidated amounts for minority partners' noncontrolling ownership interests and adding our minority ownership share of unconsolidated amounts. We do not control unconsolidated investments. While we consider pro rata disclosures useful, they may not accurately depict the legal and economic implications of our joint venture arrangements and should be used with caution.

Our supplemental reporting measures and similarly entitled financial measures are widely used by investors, equity and debt analysts and rating agencies in the valuation, comparison, rating and investment recommendations of companies. Our management uses these financial measures to facilitate internal and external comparisons to historical operating results and in making operating decisions. Additionally, these measures are utilized by the Board of Directors to evaluate management. None of the supplemental reporting measures represent net income or cash flow provided from operating activities as determined in accordance with U.S. GAAP and should not be considered as alternative measures of profitability or liquidity. Finally, the supplemental reporting measures, as defined by us, may not be comparable to similarly entitled items reported by other real estate investment trusts or other companies. Multi-period amounts may not equal the sum of the individual quarterly amounts due to rounding.

The information in this supplemental information package should be read in conjunction with our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, earnings press releases/supplements and other information filed with, or furnished to, the Securities and Exchange Commission ("SEC").

FFO and Normalized FFO

Historical cost accounting for real estate assets in accordance with U.S. GAAP implicitly assumes that the value of real estate assets diminishes predictably over time as evidenced by the provision for depreciation. However, since real estate values have historically risen or fallen with market conditions, many industry investors and analysts have considered presentations of operating results for real estate companies that use historical cost accounting to be insufficient. In response, the National Association of Real Estate Investment Trusts ("NAREIT") created FFO as a supplemental measure of operating performance for REITs that excludes historical cost depreciation from net income. FFO attributable to common stockholders, as defined by NAREIT, means net income attributable to common stockholders, computed in accordance with U.S. GAAP, excluding gains (or losses) from sales of real estate and impairments of depreciable assets, plus real estate depreciation and amortization, and after adjustments for unconsolidated entities and noncontrolling interests. Normalized FFO attributable to common stockholders represents FFO adjusted for certain items detailed in the reconciliations and described in our earnings press releases for the relevant periods.

We believe that Normalized FFO attributable to common stockholders is a useful supplemental measure of operating performance because investors and equity analysts may use this measure to compare our operating performance between periods or to other REITs or other companies on a consistent basis without having to account for differences caused by unanticipated and/or incalculable items.

NOI, IPNOI, SSNOI, REVPOR AND SS REVPOR

We define NOI as total revenues, including tenant reimbursements, less property operating expenses. Property operating expenses represent costs associated with managing, maintaining and servicing tenants for our properties. These expenses include, but are not limited to, property-related payroll and benefits, property management fees paid to operators, marketing, housekeeping, food service, maintenance, utilities, property taxes and insurance. General and administrative expenses represent costs unrelated to property operations and transaction costs. These expenses include, but are not limited to, payroll and benefits, professional services, office expenses and depreciation of corporate fixed assets.

IPNOI represents NOI excluding interest income, other income and non-IPNOI and adjusted for timing of current quarter portfolio changes such as acquisitions, development conversions, segment transitions, dispositions and investments held for sale.

SSNOI is used to evaluate the operating performance of our properties using a consistent population which controls for changes in the composition of our portfolio. As used herein, same store is generally defined as those revenue-generating properties in the portfolio for the relevant year-over-year reporting periods. Acquisitions and development conversions are included in the same store amounts five full quarters after acquisition or being placed into service. Land parcels, loans and sub-leases, as well as any properties sold or classified as held for sale during the period, are excluded from the same store amounts. Redeveloped properties (including major refurbishments of a Seniors Housing Operating property where 20% or more of units are simultaneously taken out of commission for 30 days or more or Outpatient Medical properties undergoing a change in intended use) are excluded from the same store amounts until five full quarters post completion of the redevelopment. Properties undergoing operator transitions and/or segment transitions are also excluded from the same store amounts until five full quarters post completion of the operator transition or segment transition. In addition, properties significantly impacted by force majeure, acts of God or other extraordinary adverse events are excluded from same store amounts until five full quarters after the properties are placed back into service. SSNOI excludes non-cash NOI and includes adjustments to present consistent property ownership percentages and to translate Canadian properties and UK properties using a consistent exchange rate. Normalizers include adjustments that in management's opinion are appropriate in considering SSNOI, a supplemental, non-GAAP performance measure. None of these adjustments, which may increase or decrease SSNOI, are reflected in our financial statements prepared in accordance with U.S. GAAP. Significant normalizers (defined as any that individually exceed 0.50% of SSNOI growth per property type) are separately disclosed and explained in the relevant supplemental reporting package. We believe NOI, IPNOI and SSNOI provide investors relevant and useful information because they measure the operating performance of our properties at the property level on an unleveraged basis. We use NOI, IPNOI and SSNOI to make decisions about resource allocations and to assess the property level performance of our properties.

REVPOR represents the average revenues generated per occupied room per month at our Seniors Housing Operating properties. It is calculated as the pro rata version of resident fees and services revenues per the income statement divided by average monthly occupied room days. SS REVPOR is used to evaluate the REVPOR performance of our properties under a consistent population which eliminates changes in the composition of our portfolio. It is based on the same pool of properties used for SSNOI and includes any revenue normalizations used for SSNOI. We use REVPOR and SS REVPOR to evaluate the revenue-generating capacity and profit potential of our Seniors Housing Operating portfolio independent of fluctuating occupancy rates. They are also used in comparison against industry and competitor statistics, if known, to evaluate the quality of our Seniors Housing Operating portfolio.

EBITDA AND ADJUSTED EBITDA

We measure our credit strength both in terms of leverage ratios and coverage ratios. The leverage ratios indicate how much of our balance sheet capitalization is related to long-term debt, net of cash and Internal Revenue Code ("IRC") Section 1031 deposits. We expect to maintain capitalization ratios and coverage ratios sufficient to maintain a capital structure consistent with our current profile. The ratios are based on EBITDA and Adjusted EBITDA. EBITDA is defined as earnings (net income per income statement) before interest expense, income taxes, depreciation and amortization. Adjusted EBITDA is defined as EBITDA excluding unconsolidated entities and including adjustments for stockbased compensation expense, provision for loan losses, gains/losses on extinguishment of debt, gains/losses/impairments on properties, gains/ losses on derivatives and financial instruments, other expenses, additional other income and other impairment charges. We believe that EBITDA and Adjusted EBITDA, along with net income, are important supplemental measures because they provide additional information to assess and evaluate the performance of our operations. We primarily use these measures to determine our interest coverage ratio, which represents EBITDA and Adjusted EBITDA divided by total interest, and our fixed charge coverage ratio, which represents EBITDA and Adjusted EBITDA divided by fixed charges. Fixed charges include total interest, secured debt principal amortization and preferred dividends. Our leverage ratios include net debt to Adjusted EBITDA, book capitalization, undepreciated book capitalization and market capitalization. Book capitalization represents the sum of net debt (defined as total long-term debt, excluding operating lease liabilities, less cash and cash equivalents and any IRC Section 1031 deposits), total equity and redeemable noncontrolling interests. Undepreciated book capitalization represents book capitalization adjusted for accumulated depreciation and amortization. Market capitalization represents book capitalization adjusted for the fair market value of our common stock. Our leverage ratios are defined as the proportion of net debt to total capitalization.
